ECONOMICS

GENERAL OBJECTIVES

The aim of the Unified Tertiary Matriculation Examination (UTME) syllabus in Economics is to prepare the candidates for the Board's examination. It is designed to test their achievement of the course objectives, which are to:

- 1. demonstrate sufficient knowledge and understanding of the basic concepts, tolls and their general applications to economic analysis;
- 2. identify and explain the basic structure, operations and roles of the various economics units and institutions (national and international);
- 3. describe major economic activities production, distribution and consumption;
- 4. identify and appraise the basic economic problems of society;
- 5. develop the competence to proffer solutions to economic problems.

DETAILED SYLLABUS

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Economics as a science a. Basic Concepts: Wants, Scarcity, choice, opportunity cost, Rationality, production, distribution, consumption etc b. Economic problems of: what, how and for whom to produce	Candidates should be able to: (i) compare various concepts in economics and their applications; (ii) interpret graphs/schedules in relation to the concepts; (iii) identify economic problems; (iv) proffer solutions to economic problems
2. Economic Systems a. Types: free enterprise, centrally planned and mixed economies b. Solutions to economic problems under different systems c. Contemporary issues in economic systems (e.g. economic reforms, deregulation etc)	Candidates should be able to: (i) compare the various economic systems; (ii) apply the knowledge of economic systems to contemporary issues in Nigeria; (iii) proffer solutions to economic problems in different economic systems.

	TOPICS/CONTENTS/NOTES		OBJECTIVES
3.	Methods of Economic Analysis	Candida	ites should be able to:
	a. Scientific Approach:	(i)	distinguish between the various forms of
	i. inductive and deductive methods		reasoning;
	ii. positive and normative reasoning	(ii)	apply these forms of reasoning to real life situations;
	b. Basic Tools		
	i. tables, charts and graphs	(iii)	use the tools to interpret economic data;
	ii. measures of central tendency: mean,	(iv)	analyse economic data using the tools;
	median and mode, and their	(v)	assess the merits and demerits of the tools.
	applications.		
	iii. measures of dispersion; variance,		
	standard deviation, range and their		
	applications;		
	iv. merits and demerits of the tools.		
4.	The Theory of Demand	Candida	tes should be able to:
	a. i. meaning and determinants of demand	(i)	identify the factors determining demand;
	ii. demand schedules and curves	(ii)	interpret demand curves from demand
	iii. the distinction between change in		schedules;
	quantity demanded and change in	(iii)	differentiate between change in quantity
	demand.		demanded and in demand;
	b. Types of demand:	(iv)	compare the various types of demand and
	Composite, derived, competitive etc		their interrelationships;
	c. Elasticity of demand:	(v)	relate the determinants to the nature of
	determinants, measurements, nature		elasticity;
	and applications (e.g. revenue).	(vi)	compute elasticities;
	d. Effects of changes in the determinants	(vii)	interpret elasticity coefficients in relation
	(price, income and cross elasticities).		to real life situations.
5.	The Theory of Consumer Behaviour	Candida	tes should be able to:
	a. Basic Concepts:	(i)	appraise the various utility concepts;
	i. utility (cardinal, ordinal and marginal	(ii)	apply the law of demand using the
	utilities)		marginal utility analysis;
	ii. value in use and value in exchange	(iii)	use indifference curve and marginal
	iii. indifference curve and budget line.		analyses to determine consumer
			equilibrium;

	T	OPICS/CONTENTS/NOTES		OBJECTIVES
	b.	Diminishing marginal utility and the law of demand.	(iv)	associate the income and substitution effects;
	c.	Consumer equilibrium using the indifference curve and marginal analyses.	(v)	apply consumer surplus to real life situations.
	d.	Effects of shift in the budget line and the indifference curve.		
	e.	Consumer surplus and its applications.		
6.	Th	e Theory of Supply	Candida	ates should be able to:
	a.	 Meaning and determinants of supply 	(i)	identify the factors determining supply;
		ii. Supply schedules and supply curvesiii. the distinction between change in	(ii)	interpret supply curves from supply schedules;
		quantity supplied and change in supply	(iii)	differentiate between change in quantity supplied and change in supply;
	b.	Types of Supply: Joint/complementary, competitive and	(iv)	compare the various types of supply and their interrelationships;
		composite	(v)	relate the determinants to the nature of
	c.	Elasticity of Supply: determinants, measurements, nature and	(vi)	elasticity; compute elasticity coefficients;
		applications	(vii)	interpret the coefficients in relation to real live situations.
7.	The	e Theory of Price Determination	Candida	ates should be able to:
	a.	The concepts of market and price	(i)	express the concepts of market and price;
	b.	Functions of the price system	(ii)	examine the functions of the price system;
	c.	i. Price determination under a free market	(iii)	evaluate the effects of government interference with the price system;
		ii. Price legislation and its effects	(iv)	differentiate between minimum and
	d.	The effects of changes in supply and demand on equilibrium price and quantity	(v)	maximum price legislation; interpret the effects of changes in supply and demand on equilibrium price and quantity.

TOPICS/CONTENTS/NOTES		OBJECTIVES
8.	The Theory of Production	Candidates should be able to:
a	. Concepts of production and their	(i) relate TP, AP and MP with the law of
	interrelationships (TP, AP, MP and the	variable proportion;
	law of variable proportion).	(ii) compare internal and external economies
t	o. Scale of Production:	of scale in production and their effects;
	Internal and external economies of scale	(iii) identify the types of production functions
	and their implications.	(iv) compare the different types of returns to
c	2. Production functions and returns to	the scale and their implications;
	scale	(v) determine the firm's equilibrium position
c	d. Producers' equilibrium isoquant-isocost	using the isoquant-isocost and marginal
	and marginal analyses.	analyses.
9. Th	neory of Costs	Candidates should be able to:
a	. The concepts of cost:	(i) interpret the various cost concepts
	Fixed, Variable Average and Marginal	(ii) differentiate between accountants' and
t	o. Accountants' and Economists' notions	economists' notions of costs;
	of cost	(iii) interpret the short-run and long-run costs
c	. Short-run and long-run costs	curves;
ć	1. The marginal cost and the supply curve	(iv) establish the relationship between marginal
	of firm.	cost and supply curve.
10. M	arket Structure	Candidates should be able to:
a	Perfectly competitive market: i. Assumptions and characteristics;	(i) analyse the assumptions and characteristics of a perfectly competitive
	ii. Short-run and long-run equilibrium of a perfect competitor;	market; (ii) differentiate between short-run and long- run equilibrium of a perfectly competitive firm;
t	i. Imperfect Market:i. Pure monopoly, discriminatory	(iii) analyse the assumptions and
	monopoly and monopolistic	characteristics of imperfect markets; (iv) differentiate between the short-run and
	competition. ii. Short-run and long-run equilibrium	long-run equilibria of imperfectly
	positions.	competitive firms; (v) establish the conditions for the break-
С	Break-even/shut-down analysis in the various markets.	even/shut down of firms.
11. Na	ntional Income	Candidates should be able to:
	. Concepts: GNP, GDP, NI etc	(i) identify the major concepts in national income;
l t	b. National Income measurements and their problems	(ii) compare the different ways of measuring national income;

TOPICS/CONTENTS/NOTES	OBJECTIVES
c. Uses of national incomes estimates d. The circular flow of income (three-sector model) e. The multiplier concept. f. Elementary theory of income determination and equilibrium national income.	(iii) examine their problems; (iv) assess the uses and limitations of national income estimates; (v) interpret the circular flow of income using the three-sector model; (vi) calculate the multipliers; (vii) evaluate their effects on equilibrium national income.
12. Money and Inflation	Candidates should be able to:
 a. Types and functions of money b. Demand for money and the supply of money c. Quantity Theory of money (Fisher equation) d. Inflation: Types, measurements, effects and control 	(i) differentiate between the types and functions of money; (ii) determine the factors affecting the demand for and the supply of money; (iii) identify the components in the quantity theory of money; (iv) examine the causes and effects of inflation; (v) calculate the consumer price index; (vi) interpret the consumer price index; (vii) examine ways of controlling inflation.
13. Banking	Candidates should be able to:
 a. Types and functions of banks b. The creation of money c. Challenges facing the banking industry in Nigeria (reforms, consolidation) d. The role of banks in economic development e. Monetary policy and its instruments. 	 (i) compare the types of banks and their functions; (ii) trace the money-creation process and factors affecting it; (iii) appraise the challenges facing the banking industry; (iv) examine the role of banks in economic development; (v) examine the various monetary policy instruments and their effects.
14. Public Finance	Candidates should be able to:
 a. Meaning and objectives b. Sources of government revenue (taxes royalties, etc) c. Principles of taxation d. The effects of public expenditure e. Government budget and public debts f. Revenue allocation and resource control in Nigeria 	 (i) identify the objectives of public finance; (ii) compare the various sources of government revenue; (iii) analyse the principles of taxation; (iv) examine the effects of public expenditure on the economy; (v) examine the types and effects of budgets; (vi) highlights the criteria for revenue allocation in Nigeria and their impact.
15. Economic Growth and Development	Candidates should be able to:
a. Meaning and scopeb. Indicators of growth and developmentc. Factors affecting growth and	(i) distinguish between economic growth and development; (ii) highlight the indicators of growth and

TOPICS/CONTENTS/NOTES	OBJECTIVES
development d. Problems of development in Nigeria e. Developing planning in Nigeria.	development; (iii) identify the factors affecting growth and development; (iv) assess the problems of development in Nigeria; (v) examine the role of planning in development;
16. Agriculture in Nigeria	Candidates should be able to:
 a. The role of agriculture in economic development; b. Characteristics and problems; c. Effects of agricultural policies; d. Instability in agricultural income (causes, effects and solutions) 	 (i) identify the characteristics and problems of agriculture; (ii) assess the role of agriculture in economic development; (iii) appraise some agricultural policies; (iv) evaluate the causes and effects of instability in agricultural income.
17. Industry and Industrialization	Candidates should be able to:
 a. Concepts and effects of location and localization of industry in Nigeria; b. Problems of Industrialization strategies (e.g. export promotion, import substitution etc) c. SMEs and economic development in Nigeria 	 (i) differentiate between location and localization of industry; (ii) identify the factors influencing the location and localization of industry; (iii) examine the problems of industrialization; (iv) appraise some industrialization strategies; (v) examine the role of industry in economic development.
18. Petroleum and the Nigerian Economy	Candidates should be able to:
 a. Development of the petroleum industry in Nigeria; b. Contributions of petroleum to the Nigerian economy; c. Linkage effects; d. Upstream/downstream activities. 	 (i) trace the development of the petroleum industry in Nigeria; (ii) assess the contribution of petroleum to the Nigerian economy; (iii) establish the linkages between the petroleum and other sectors; (iv) analyse the environmental effects of exploration activities in Nigeria; (v) distinguish between the upstream and downstream activities; (vi) suggest ways of controlling the effect of oil exploration.
19. Business Organizations	Candidates should be able to:
 a. Private enterprises (e.g. sole-proprietorship, partnership, limited liability companies and cooperative societies) b. Problems of private enterprises; c. Public enterprises; 	 (i) compare the types and basic features of private business organization; (ii) assess the financing and management problems of business organizations; (iii) identify the features of public enterprises; (iv) differentiate between privatization and

	TOPICS/CONTENTS/NOTES	OBJECTIVES
	d. Privatization and Commercialization as solutions to the problems of public enterprises.	commercialization; (v) compare the advantages and disadvantages of privatization and commercialization;
20.	Population	Candidates should be able to:
	 a. Meaning and theories; b. Census: importance and problems. c. Size and growth: over-population, underpopulation and optimum population. d. Structure and distribution; e. Population policy and economic development. 	 (i) analyse the features of some population theories: (ii) examine the relevance of the theories to Nigeria; (iii) examine the uses and limitations of census data; (iv) identify determinants of the size, composition and growth of population; (v) analyse the structure and distribution of population; (vi) appraise government population policy in Nigeria.
21.	 International Trade a. Meaning and basis for international trade (absolute and comparative costs etc) b. Balance of trade and balance of payments: problems and corrective measures; c. Composition and direction of Nigeria's foreign trade; d. Exchange rate: meaning, types and determination. 	Candidates should be able to: (i) examine the basis for international trade; (ii) differentiate between absolute and comparative advantages; (iii) distinguish between balance of trade and balance of payments and their corrective measures; (iv) highlight the problems of balance of payments and their corrective measures; (v) examine the composition and direction of Nigeria's foreign trade; (vi) identify the types of exchange rates; (vii) examine how exchange rates are determined.
22.	International Economic Organizations	Candidates should be able to:
	Roles and relevance of international organization e.g. ECOWAS, AU, EU, OPEC, ECA, IMF, EEC, OECD, World Bank, IBRD, WTO, ADB and UNCTAD etc to Nigeria.	(i) identify the various economic organizations and their functions; (vii) evaluate their relevance to the Nigerian economy
23.	Factors of Production and their Theories	Candidates should be able to:
	 a. Types, features and rewards; b. Determination of wages, interest and profits; c. Theories: marginal productivity theory of wages and liquidity preference theory; d. Factor mobility and efficiency; e. Unemployment 	 (i) identify the types; features and rewards of factors; (ii) analyse the determination of wages, interest and profits; (iii) interpret the marginal productivity of liquidity preference theories; (iv) examine factors mobility and efficiency; (v) examine the types and causes of unemployment in Nigeria; (vi) suggest solutions to unemployment in Nigeria.
